

AIR+CARE

WOUND CARE I-IV

AIR+CARE is available in 36", 42", 48" and 54" mattress sizes and has weight capacity ranging from 350 lb to 1000 lb. By popular demand we have included our 'Happy Heels' feature in the AIR+CARE

866.212.2955

Our gold standard for wound care

Every facility needs a great low air loss mattress that is affordable and effective to handle the prevention and treatment of Stage I-IV pressure injuries. This technology takes care of the most sensitive pressure points, ensuring comfort and protection. By reducing skin moisture, pressure, and heat, the AIR+CARE mattress dramatically minimizes the risk of pressure injuries, enhancing patient well-being. For most individuals with mobility concerns or those recuperating from long-term bed rest the AIR+CARE is more than just a mattress - it's a step towards enhanced recovery, sustained comfort, and improved quality of life.
